Meet Your UltraLux Air Sentry 1000

Congratulations on choosing the UltraLux Air Sentry 1000! We are excited for you to take this next step in your health and wellness journey. We hope you'll enjoy the powerful purification of High Efficiency Particulate Air (HEPA) filtration.

While many air purifiers use carbon filters to provide better smelling air, the UltraLux Air Sentry 1000 goes above and beyond. **It utilizes a 3-filtration system, including dual HEPA 13 or 14 filters**, which effectively prevents sickness, allergies and odors! With the power of clean air in your home, achieving your healthiest self has never been easier.

What Sets the UltraLux Air Sentry 1000 Apart?

The UltraLux Air Sentry 1000 truly has it all! With quality features and innovative design, it surpasses other air purifiers in effectiveness and performance. Not only does the UltraLux Air Sentry 1000 excel in its technical capabilities, but it also offers unparalleled convenience. Its user-friendly interface makes it easy to operate and customize according to your individual needs. The UltraLux Air Sentry 1000 is not just an air purifier, but a complete solution for clean air!

Powerful Three Filter System:

Our custom filtration system can deliver the cleanest, toxin-free air to your home. The Air Sentry 1000 combines proven HEPA 13, carbon filtration, and UV-C light technology to deliver fresh air to your home. With this system in place, your spaces can be free of odors, viruses, allergens and other pollutants.

What Sets the UltraLux Air Sentry 1000 Apart?

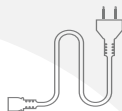

Clean, Fresh Air Wherever You Are

Whether you're in a heavily polluted city or you're looking for a fresh start for your home, the Air Sentry 1000 has you covered! With carbon filtration technology, you can rid your air of unpleasant smells, and replace it with the cleanest air you've ever experienced. The Air Sentry 1000 is rated to purify an area of up to 1,033 square feet.

CDC-Recommended

To improve cleanliness and keep sicknesses at bay, the Centers for Disease Control (CDC) recommends using portable HEPA filtration systems to enhance air cleaning. This eliminates the risk of contaminants that are brought home from your school, work, or local store.

HEPA 13 vs HEPA 14 Filters

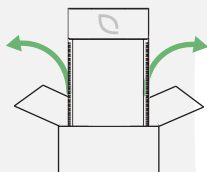

HEPA 13

The HEPA 13 removes 99.97% of particulates with a 0.3 micron filter. This is ideal for dust, allergens, pet dander, mold, and bacteria. Because of the filter size it can circulate air faster than a HEPA 14. The HEPA 13 is best when used in the spring and summer months.

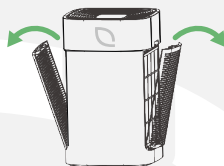

HEPA 14

The HEPA 14 removes 99.995% of particulates with a 0.1 micron filter. This smaller filter size is better for catching and removing viruses, which makes it ideal for using during flu season and the winter months.

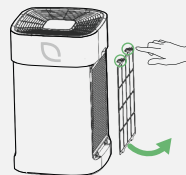

How to Install and Use Your UltraLux Air Sentry 1000

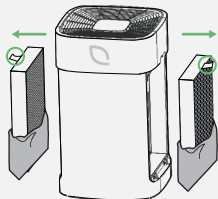

- 1.** Take your Air Sentry 1000 unit out of the box and remove the plastic wrapping around the unit.
Skip this step when replacing your filters

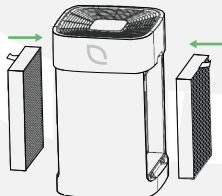

- 2.** Utilize both handles on the sides of the Air Sentry 1000 to remove the covers, along with the filter screens.

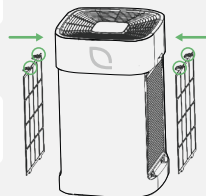

- 3.** Remove the filter screens by first unclipping from the top clips, then lifting out.

- 4.** Pull out the HEPA filters by gently pulling on the white ribbon at the top of the filter. Remove any plastic covering the filters.

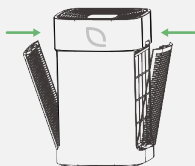

- 5.** Replace the filters with the black carbon filter facing out. Ensure that the white ribbon is at the top.

- 6.** Replace the filter screen by inserting the plastic stays in the gaps at the bottom of the filter. Then push the filter into place. The filter screen will clip into place at the top.

How to Install and Use Your UltraLux Air Sentry 1000

7. Install the front and rear covers back on the Air Sentry 1000, ensuring they are secure.

8. Plug the power cord, attached to the bottom of the Air Sentry 1000 unit, into a wall power outlet.

9. Next, simply tap the red power button located on the right side of the display panel and it will illuminate green. Then the outline of the display panel will illuminate blue.

Now it's time to purify!

Display Panel Functions

To Adjust Air Purifier Modes:

When the Air Sentry 1000 is powered on, it will initiate the Automatic Mode, signified by an illuminated 'AUTO'

- 1x  To initiate Turbo Mode, tap the Mode button, located on the right side of the display panel. A smoke symbol will illuminate due to this mode effectively purifying areas with high concentrations of smoke.
- 2x  To initiate Sleep Mode, tap the Mode button once more. A moon will illuminate and all buttons will reduce brightness.
- 3x  To return to Automatic Mode, tap the Mode button again.

To Adjust Fan Speed Manually:

When the Air Sentry 1000 is powered on, the Low Fan Speed setting will initiate.

- 1x  To initiate Mid Fan Speed, tap the Fan Speed button, located on the bottom of the display panel.
- 2x  To initiate the High Fan Speed, tap the Fan Speed button once more.
- 3x  To return to the Low Fan Speed, tap the Fan Speed button again.

Display Panel Functions

To Lock Settings:

- 1x  Press and hold the Child Safety Lock button for 5 seconds, located on the left side of the display panel, and the air purifier will lock all settings.
- 2x  To unlock, press and hold the Child Safety Lock for 5 more seconds.

To adjust Timer settings:

The Timer will initiate Always On Mode when the Air Sentry 1000 is powered on.

- 1x  Tap the Timer button, located at the bottom left of the display panel, and it will illuminate white.
- 2x  You can set your air purifier to operate for 2 hours, 4 hours, 6 hours, or 8 hours by pressing the Timer button until either the 2h, 4h, 6h, or 8h is illuminated.

Once you have made your timer selection, the countdown will begin.

For Air Quality Index (AQI)

At the top of the display panel are 3 large numbers, signifying the air quality index (AQI) in the current area.

000-050

Good

051-100

Moderate

101-150

Unhealthy for
Sensitive Groups

151-200

Unhealthy

201-300

Very Unhealthy

301-400

Hazardous

When the air quality is good, the ring lamp around the display panel will illuminate blue.

When the air quality is moderate, the ring lamp around the display panel will illuminate green.

When the air quality is unhealthy, the ring lamp around the display panel will illuminate orange.

When the air quality is very unhealthy or hazardous, the ring lamp around the display panel will illuminate red.

For Filter Replacement

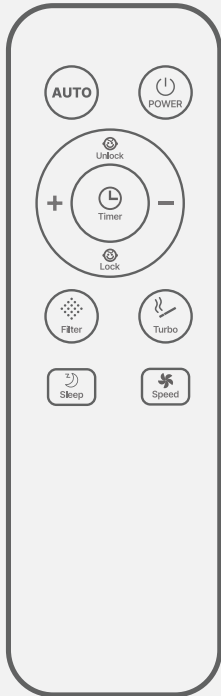

The filter replacement reminder is set at 3,000 hours. Once the current filter is nearing the end of its lifetime, the Filter button will illuminate red , signaling a need for a filter replacement.

Once the expiring filter has been taken out and replaced, tap and hold the Filter button for 3 seconds, and the air purifier will reset the filter lifetime.

For step by step instructions refer to Steps 2-7 on page 7.

Remote Functions

To turn on your Air Sentry 1000, press the Power button located on the top right corner of the remote. Ensure the remote is pointed towards the front of the unit for optimal button response.

To Adjust Air Purifier Modes:

When the Air Sentry 1000 is powered on, it will initiate the Automatic Mode, signified by an illuminated 'AUTO'

To initiate **Turbo Mode**, press the Turbo button, signified with a smoke symbol due to this mode effectively purifying areas with high concentrations of smoke.

To initiate **Sleep Mode**, press the Sleep button, signified with a moon. This will reduce brightness of all illuminated buttons on the Air Sentry 1000 display panel.

To return to **Automatic Mode**, press the AUTO button, located on the top left corner of the remote.

To Adjust Fan Speed Manually:

When the Air Sentry 1000 is powered on, the Low Fan Speed setting will initiate.

To initiate Mid Fan Speed, press the Fan Speed button. To initiate the High Fan Speed, press the Fan Speed button once more. To return to the Low Fan Speed, tap the Fan Speed button again.

Remote Functions

To adjust Timer settings:

The Timer will initiate Always On Mode when the Air Sentry 1000 is powered on.

Timer

Press the **Timer button**, located in the middle of the direction pad to begin a timer. You can set your air purifier to operate for **up to 12 hours**.

Starting at 0, you can increase your timer by pressing the **Add button**, signified with a + symbol, located on the left side of the circular direction pad. To decrease the timer,

press the **Subtract button**, signified with a - symbol, located on the right side of the circular direction pad.

Then leave the timer on your desired timer selection, and the countdown will begin.

To Lock settings:

When the Air Sentry 1000 is powered on, the Low Fan Speed setting will initiate.

Lock

Press the **Child Safety Lock button**, located on the bottom of the circular direction pad, and the air purifier will lock all settings.

Unlock

To unlock, press the **Child Unlock button**, located on the top of the circular direction pad, and the air purifier will unlock settings.

For Filter Replacement:

Once the current filtration is nearing the end of its lifetime, the Filter button will illuminate red on the display panel, signaling a need for a filter replacement. The filter replacement reminder is set at 3,000 hours.

Once the expiring filter has been taken out and replaced, tap and hold the Filter button for 3 seconds on the remote, and the air purifier will reset the filter lifetime.

Care Instructions

To clean your UltraLux Air Sentry 1000 unit:

- Use a damp cloth to wipe the exterior of the unit, avoiding any liquid from entering into the air purifier.

To clean the top Particulate Sensor:

- Gently pull off the top cover of the unit, holding on to the air grid. Once removed, wipe the lens with a dry cotton swab to remove any dirt or dust.
- Use a vacuum cleaner or air dryer to clean the air sensor cover. Then place the top cover of the unit back on the air purifier, matching the triangle Δ on the air grid to the right side of the air purifying unit.
- We recommend cleaning your Air Sentry 1000 approximately every two months to reduce dirt build up.

To clean your Dual Filtration system:

- Use the side handles to remove the covers on the sides of the the Air Sentry 1000.
- Pull out the primary filter screens on both sides, leaving the HEPA filters in the unit.

- Use a vacuum cleaner, brush, or water to clean the dirt and dust off the screens. Once done, ensure the filter screens are dry before reinstallation.

Safety Instructions

To prevent damage, turn off your Air Sentry 1000 and unplug the power adapter from the wall outlet before cleaning.

- Do not wash the mainframe with solvent or harsh chemicals in order to avoid corrosion and damage.
- When the purifier is powered on, maintain a 20 cm space between the back of the air Sentry 1000 and the wall, and 30 cm on the sides.
- Do not place the Air Sentry 1000 in high temperature environments.

Warranty

All new UltraLux Health products come with a 1-year manufacturer defects warranty that is only valid for the original buyer. In order for the warranty to apply to a defective item, the item must be in good condition, excluding the claimed defect. Contact **support@ultraluxhealth.com** with photo or video evidence of the defective unit.

Whether or not the item is covered under warranty is under full discretion of UltraLux Health. If the item is covered, a replacement unit will be shipped to the customer at no extra cost. Warranties cover labor, defective parts, and the shipping of the replacement product to the customer.
