Meet Your UltraLux Air Sentry 100

Congratulations on choosing the UltraLux Air Sentry 100! We are excited for you to take this next step in your health and wellness journey. We hope you'll enjoy the powerful purification of High Efficiency Particulate Air (HEPA) filtration.

While many air purifiers use carbon filters to provide better smelling air, the UltraLux Air Sentry 100 goes above and beyond. **It utilizes 3 filtration systems, which effectively prevents sickness, allergies, and odors!** With the power of clean air in your home, achieving your healthiest self has never been easier.

What Sets the UltraLux Air Sentry 100 Apart

The UltraLux Air Sentry 100 is a clear step above the rest! With quality features and innovative design, it surpasses other air purifiers in performance and effectiveness. Not only does the UltraLux Air Sentry 100 excel in its technical capabilities, but it also offers unparalleled convenience. Its user-friendly interface makes it easy to operate and customize according to your individual needs. **The UltraLux Air Sentry 100 is not just an air purifier, but a complete solution for clean and fresh air!**

Powerful Three Filter System:

Our custom filtration system can deliver the cleanest, toxin-free air to your home. The Air Sentry 100 combines proven HEPA, Carbon and UV-C filtration technology to deliver fresh air to your home. With this system in place, your spaces can be free of odors, viruses, allergens and other pollutants.

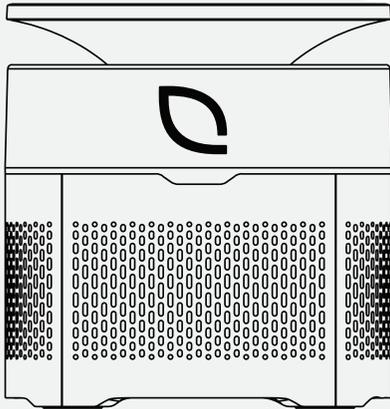

Clean, Fresh Air Wherever You Are

Whether you're in a heavily polluted city or you're looking for a fresh start, the Air Sentry 100 has you covered! **With carbon filtration technology, you can rid your air of unpleasant smells, and replace it with the cleanest air you've ever experienced.** Whether at home or in the office, the **Air Sentry 100 purifies a 100 sq. ft. radius.**

CDC-Recommended

To improve cleanliness and keep sicknesses at bay, the Centers for Disease Control (CDC) recommends using portable HEPA 13 filtration systems to enhance air cleaning. This eliminates the risk of contaminants that are brought home from your school, work, or local store.

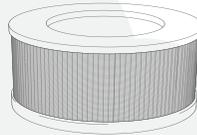

What's Inside the Box

1 X UltraLux Air
Sentry 100

1 X Power
Cord

1 X HEPA 13 &
Activated Carbon
Filtration

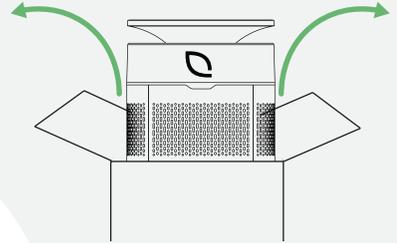

1 X User
Manual

How to Use

1.

Take your Air Sentry 100 unit out of the box and remove the plastic wrapping around the unit.

2.

To turn on your air purifier, plug the power cord into the power port at the bottom of the Air Sentry 100 unit, making sure the connection is secure. Then plug the power cord into a wall power outlet.

Display Panel Functions

To Adjust Fan Speed

When the Air Sentry 100 is powered on, it will initiate a default Mid Wind setting, signified by two illuminated lines. ||

- 1x  To initiate High Wind setting, tap the Fan button and three lines will illuminate. |||
- 2x  To initiate Sleep Mode fan speed, tap the Fan button once more and a half moon and star ☾★ will illuminate.
- 3x  To initiate Low Fan Mode speed, tap the Fan button again and a singular line will illuminate. |

To adjust Timer settings:

The Timer will initiate Always On Mode when the Air Sentry 100 is powered on.

- 1x  Tap the Timer button, located at the bottom left of the display panel, and it will illuminate white.
-  You can set your air purifier to operate for 2 hours, 4 hours, 6 hours, or 8 hours by pressing the Timer button until either the 2h, 4h, 6h, or 8h is illuminated.

Once you have made your timer selection, the countdown will begin.

Display Panel Functions

For Sterilized Air

Tap the Sterilization button, located on the left of the touch display panel, and it will illuminate white. The LED UV-C Sterilization lamp will initiate and begin to disinfect the air in the space.

To end the sterilizing, press the Sterilization button once more and it will turn off the LED UV-C Sterilization lamp.

For Filter Replacement

When the Filter Reset button, located on the right side of the touch panel, pulses as you power on your Air Sentry 100, it is time to replace the HEPA filter.

HOLD

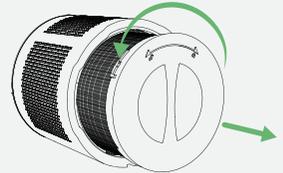

Once you have replaced the filter inside your Air Sentry 100, press the Filter Reset button for 3 seconds while the unit is powered on. The air purifier will automatically recalculate the filter life time.

How To Replace The Filter

The Air Sentry 100 filter purifiers air for up to 1,500 hours of use, and it's incredibly simple to replace the filter.

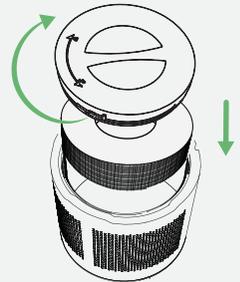

1.

Turn the Air Sentry 100 upside down and rotate the filter cover counterclockwise, following the arrows. Then take out the circular HEPA filter.

2.

Replace the filter with the new Air Sentry 100 Replacement Filter. Place the new air filter into filter housing. Adjust until it's securely seated. Replace the cover and turn clockwise to lock the cover in place.

Care Instructions

To clean your UltraLux Air Sentry 100 unit:

Use a damp cloth to wipe down the outside of the unit. However, do not allow water or vapors to enter into the air purifier unit.

Both the HEPA filter and air inlet should be cleaned gently by using a vacuum cleaner to suck any dust or debris from their surfaces. To clean the air inlet, use a damp cloth to wipe the wind inlet.

Remember the filters are not washable, so water should not be used on the filter. More frequent cleaning may be necessary, depending on the air quality.

Safety Instructions

To prevent damage, turn off your Air Sentry 100 and unplug the power cord from the wall outlet before cleaning.

Avoid touching any moving parts within the air purifier, and never insert your fingers or any other objects through the fan guard.

Do not place any objects on top of the touch display panel to prevent unintended activation of the Air Sentry 100.

Do not place the Air Sentry 100 near high temperature environments.

This is not a humidifier or diffuser. Do not pour liquids, oils, scents, or powder into the purifier.

Product Specifications

Product Name	UltraLux Air Sentry 100
