Meet the UltraLux Anti-Aging Red Light Therapy Mask

Thank you for purchasing the UltraLux Anti-Aging Red Light Therapy Mask! We hope you'll enjoy the expert-level regenerative and healing aspects of red light therapy in the comfort of your own home.

Skip the trip to the dermatologist and revive your skin at home! **With 4 FDA-cleared wavelengths specialized for reversing aging effects, acne, and pigmentation**, the Anti-Aging Red Light Therapy Mask is your one-stop shop for the best skin of your life!

What Sets the UltraLux Anti-Aging Red Light Therapy Mask Apart?

Clinic-Quality Healing at Home: Experience the best of skincare technology without harsh chemical products, and without leaving the comfort of your home.

Combination of 4 FDA-Cleared Light Wavelengths:

The UltraLux Anti-Aging Mask includes red, blue, yellow and infra-red light wavelengths to combat any skin issue you have. Built with unique wavelengths to address your unique skincare needs, the UltraLux Anti-Aging Mask will give you the best skin of your life.

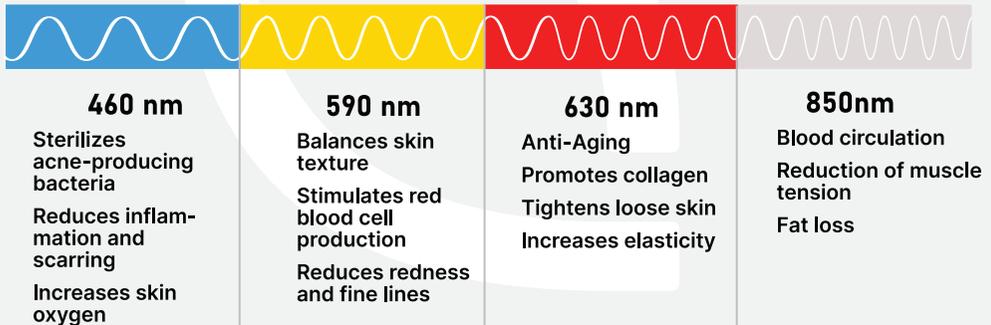

Two Treatment Areas in One Session:

The UltraLux Anti-Aging Mask includes a chest and neck style piece to share the skincare love. Your chest and neck areas are some of the fastest-aging regions of your body, and our medical-grade light therapy is ready to help.

Ultralux Anti-Aging Red Light Therapy Mask Health Benefits

By offering a range of light settings, the UltraLux Red Mask can help you take full advantage of your red light therapy sessions.

Nanometers*

*Nanometers are the units of measure for light wavelengths.

What's Included

1x Neck and Chest Piece

1x Battery & Controller

1x USB Cable

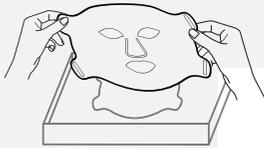

1x Adaptor

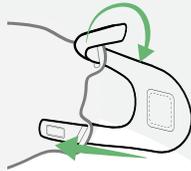

1x User Manual

How to Use

- 1.** Remove face mask and neck piece from the box.

- 2.** Insert the included face mask velcro straps into the designated cutouts on the sides of the mask.

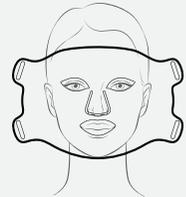

- 3.** Do the same with the neckpiece cutouts. You do not need to use the neck attachment in your red light sessions, however, if you would like to target your neck and chest area for desired results, we recommend including it in your sessions.

- 4.** Remove the protective plastic film from the back of the Anti-Aging Mask.

- 5.** Next, attach the silicone eye cups to the facial style mask by pushing the lip of the eye cup through the eye slits. Massage until the eye cups and mask are comfortably seated.

- 6.** Then place the face mask on your face, making sure that your eyes and nose line up with the eyes and nose cut outs of the mask.

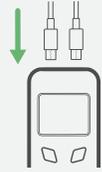

How to Use

- 7.** Attach the straps by lining up the velcro piece of the first strap to the fuzzy side of the second strap. Loosen or tighten the straps to ensure a comfortable fit.

- 8.** For the neckpiece, wrap the straps around your neck matching up the first strap with the second velcro strap. Loosen or tighten the straps to ensure a comfortable fit.

- 9.** Next, plug the USB-C connector from the mask into the USB-C port of the remote controller. Repeat with the cord of the neckpiece if desired.

- 10.** Then simply select your desired treatment session. See Remote Functions for instructions on how to adjust wavelengths and other features.

Remote Functions

To turn on or off, press and hold the power button.

NIR

Select the “NiR” button for Near-infrared light (850nm).

E

Select the “E” button to choose the power level:

Press once for 50% power.

Press twice for 75% power.

Press three times for 100% power.

M

Select the “M” button to choose the light mode:

Blue (460nm)

Yellow (590nm)

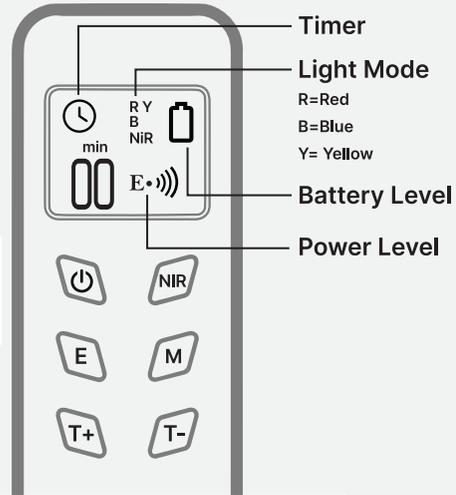

Red (630nm)

T+

Use the “T+” button to increase the timer.

T-

Use the “T-” button to increase the timer.

Charging Your Remote

Before using your Red Mask, ensure that your remote controller is charged.

Plug the provided power cord into the bottom of the remote controller, then connect the USB end of the cord to connect to the provided power bank.

Then plug that power bank into a power wall outlet.

The remote controller will begin to charge.

Remote Functions

Ensure that the cord of the mask is connected to the remote controller before beginning use. Additionally, if you would like to use the Neckpiece ensure that the cord is connected to the remote controller as well.

To turn your Red Mask, or neckpiece, on or off, press and hold the power button on the remote controller.

Press the “M” button to choose the light mode.

Red Light 630 nm

The use of red light is a fundamental aspect of red light therapy. Red light is known to penetrate the skin and stimulate the mitochondria within cells. This stimulation enhances the production of adenosine triphosphate (ATP), the primary energy currency of cells. With an increase of ATP, there is an improvement of muscles recovery, anti-inflammatory effects, skin health, and so much more.

Blue Light 460 nm

Blue light has anti-inflammatory effects that help reduce inflammation in the skin. When used in conjunction with red light therapy, which also has anti-inflammatory properties, it may enhance the overall anti-inflammatory response. Combining blue light with red light therapy may provide a broader range of benefits, targeting both skin conditions and promoting overall skin health.

Remote Functions

Yellow Light 590 nm

Yellow light is often associated with improving skin tone and texture. It can stimulate collagen production and promote overall skin rejuvenation. It has been suggested to have positive effects on microcirculation in the skin. Improved blood flow can contribute to better oxygenation and nutrient delivery to the cells, supporting overall tissue health.

Select the “NiR” button for Near-infrared light (850nm). This near-infrared light will operate with the selected colored light and will be invisible to the human eye.

Press the “E” button to choose the power level:

Press once for 50% power.

Press twice for 75% power.

Press three times for 100% power.

To adjust the specified time of your red light therapy session, you can increase or decrease the timer.

Use the “T+” button to increase the timer.

Use the “T-” button to decrease the timer.

Frequently Asked Questions

How long will it take to notice results?

You may start to notice visible results in as little as 4 weeks of consistent use. Individual results may vary depending on skin type and condition. We recommend using the UltraLux Anti-Aging Mask for at least 8 weeks for noticeable results.

Is Red Light bad for my eyes?

Red light is good for your eyes, however the Anti-Aging Mask does not provide enough direct light to your eyes for it to be useful. Most customers find it useful to close their eyes while using the Red Mask.

What is irradiance?

Irradiance measures the strength and effectiveness of a light wavelength. UltraLux uses high irradiances on all red light therapy products to ensure real, powerful results.

Are there side effects from using this mask?

Red light therapy is not associated with any adverse side effects if used as directed.

How does red light therapy work?

Red light therapy delivers natural, non-invasive wavelengths of light to the cells in our bodies. When these light wavelengths are absorbed, the mitochondrion are stimulated, creating more energy within our bodies. As a result, this cellular energy is used to increase the health and effectiveness of our bodily functions.

Frequently Asked Questions

Is red light therapy safe?

Red light therapy is a noninvasive, safe alternative for skincare and overall health. It does not require any harsh topical treatments, which can irritate and damage the skin. Red light therapy does not use UV light, which has been linked to skin cancer and other damage. When used as directed, red light therapy is considered safe for aiding in weight loss, alleviating pain, and treating common skin conditions. If you have questions about your particular condition or situation, please consult a medical professional before using red light therapy.

Will I get a tan from using the device?

No, you will not get a tan. The wavelengths used in all of the UltraLux red light products do not contain UVA or UVB rays, meaning there is no risk for tanning or sun damage.

Do I need to clean the device? How do I clean it?

We recommend cleaning the mask between each use. To clean, use a water-based wipe or wet paper towel to gently clean the LEDs and the silicone portion of the mask. Allow to dry completely before use.

Safety Instructions

Not intended for use by children or pregnant or breastfeeding women.

Do not use this product if you have any light sensitivity disorder.

Make sure to wear the mask correctly around the eye region; do not cover eyes with the LED diode portion of the mask. Close eyes during treatment session to avoid eye damage or irritation.

Discontinue use immediately if you experience any discomfort while using the mask.

Consult Your Doctor If You:

Have any medical questions regarding red light therapy.

Experience negative reactions or effects from using this device.

Are taking drugs or medication known to cause light sensitivity.

Have any discomfort while using the

Care Instructions

Before storing your device, unplug it and keep it in a cool, dry area away from direct sunlight.

To Clean the Device:

This device is water-resistant, **NOT WATERPROOF.**

Do not submerge the Anti-Aging Mask or its components in water.

Make sure all cords are disconnected, and that the device is powered off.

Use a damp cloth or paper towel to clean the mask. Only clean the outside silicone portion of the mask, avoiding the LED diodes and panels.

Never submerge your mask in water or other liquids.

Allow your Red Mask to air dry before using it again.

Warranty

RED LIGHT ANTI-AGING MASK

HEALTH GUIDE

UltraLux Red Anti-Aging Mask

Health Guide

The UltraLux Health Red Anti-Aging Mask has benefits for all types of skin conditions. Whether desiring to improve uncomfortable skin conditions or simply desire healthier skin, the Red Anti-Aging Mask can be your solution. This Red Mask Health Guide will provide you with information to facilitate quality results.

Supported Principles of the Red Anti-Aging Mask

Red light therapy (RLT) supports various principles related to internal biological processes that promote hair, skin, and mental health. The UltraLux Red Anti-Aging Mask supports these same processes while targeting the skin, facial features, and brain. Additionally, we advise consulting a doctor if you have questions about a specific condition related to these targeted areas. However, if your specific condition would improve by experiencing a principle listed below, then the Red Anti-Aging Mask is right for you!

Increased Collagen

Collagen is a structural protein that provides support to the skin and hair. Red light therapy increases this collagen production, supporting the skin to become more supple, leading to a reduction in the appearance of fine lines and wrinkles.

Stimulation of Cellular Activity

Red light therapy enhances cellular function by promoting increased energy production (ATP) within the cells. This may lead to improved cell metabolism and overall cellular health in the body.

Reduction of Inflammation

There are anti-inflammatory effects within red light therapy that can reduce inflammation in the skin. The anti-inflammatory effects can help alleviate redness, swelling, and discomfort associated with these skin conditions.

Increased Blood Circulation

Red light therapy stimulates blood flow. Improved blood circulation ensures better delivery of oxygen and essential nutrients to the cells in the treated area. This can be particularly beneficial for the skin on the face, as it enhances the supply of vital elements needed for cellular metabolism and overall skin health.

Mental Health

Exposure to red light is believed to stimulate cellular activity, particularly in the mitochondria, leading to enhanced energy production and improved neurotransmitter function. The release of certain neurotransmitters, such as serotonin and endorphins, which play key roles in mood regulation and emotional well-being.

How to Optimize Red Anti-Aging Mask Benefits

Tailoring your red light therapy sessions is great for achieving goals and maximizing the potential benefits of this treatment faster. **Optimizing sessions to individual goals allows for a more targeted and effective approach.**

The UltraLux Anti-Aging Mask and neckpiece allow you to adjust your red light therapy sessions for your needs.

Anti-Aging Benefits

Use Red Light at 75% for 15 minutes at a time. Do this 3-4 times per week and increase frequency if desired. Decrease frequency or power if you develop skin irritations, burning sensations, or pain.

**3-4

What to Avoid

When using the UltraLux Red Anti-Aging Mask, it is important to maintain your health and safety. We recommend avoiding the following in order to receive the results you want, while protecting yourself.

Overexposure

We recommend not exceeding 30 minutes per session. Do not wear your mask or neck piece overnight.

Not Consulting a Doctor About Conditions and Medications

If you suffer from a specific scalp condition or are taking photosensitizing medications, and do not consult with a healthcare professional or dermatologist, there may be adverse effects. Talk to your doctor, and they can provide personalized advice based on your health status.

Inconsistency in Use

Consistency is key with red light therapy. Avoid sporadic or irregular usage, as regular and consistent sessions are more effective for achieving quality results. But do not exceed recommended session time.
